A smart fitness assistant that calculates BMI and generates personalized workout plans for every fitness level.

The Fitness Planning Challenge

The Problem

Millions of people want to improve their fitness but struggle with where to start. The fitness industry is overwhelming, and most available plans are generic templates that ignore individual body conditions.

- Beginners don't know whether to bulk, cut, or maintain
- Generic online plans don't account for personal metrics
- No simple way to match workouts to body condition
- Confusion leads to inaction or ineffective routines

Beginner Confusion

Most people don't understand their fitness condition or what goals are right for their body type

Generic Solutions

Available workout plans online are one-size-fits-all templates that ignore individual metrics

No Personalization

Lack of simple guidance based on actual body condition leads to frustration and inaction
